

Beautifully finished, our Inspire range of heaters are the highest quality on the market and are available in a number of finishes ranging from white panels to bespoke, personalised pictures and mirror panels. Manufactured to the highest standards in Germany, they are designed and built to last a lifetime and come complete with a 10 year warranty.

Inspire White infrared heaters provide a more efficient form of heating than conventional heating systems whilst offering higher thermal comfort levels. The ultra-slim Inspire White panel heaters are a great space-saving solution designed to be beautifully discreet and complement any environment. They are suitable for both domestic and commercial installations. The Inspire panels are specifically designed to be maintenance free and to last for many years.

The Inspire White panels do not have any in-built controls and must be used in conjunction with Herschel iQ controls or equivalent. This will ensure full compliance with European energy saving regulation (ERP Lot 20).

Available Models

Model Number	Dimensions	Weight	Power	Heated Area*
CL-200	30 x 60 cm	4 kg	250 W	3 - 5 m ²
CL-300	30 x 90 cm	5 kg	350 W	4 - 7 m ²

CL-750L	40 x 170 cm	10 kg	820 W	11 - 18 m ²
CL-900	80 x 100 cm	12 kg	900 W	13 - 22 m ²
CL-1200	80 x 120 cm	15 kg	1200 W	17 - 29 m ²
CL-1200L	60 x 160 cm	15 kg	1250 W	17 - 29 m ²

Technical Details

Surface	Aluminium, powder coated
Colour	White 9016
Rear Panel	Sheet steel, powder coated, mounting points
Surface Temperature	95 - 105°C
Voltage	230V 50Hz
Protection Class	IP54
Cable	1.8m
Installation	Wall or ceiling mounted
Certificates	     
Warranty	10 years

* The heated areas are an indicative guide only. The actual heated area will depend on the heat loss of the room which is influenced by many factors including construction type, external walls, window area and insulation levels. Always use the Herschel online calculator or contact your dealer or installer for an accurate specification.

Important

The Inspire panel comes with two mounting brackets. When installed, the front of the panel will extend a total of 5cm from the wall. The panel will radiate heat into the room and will perform best when mounted in a position free of any direct obstructions such as a sofa. The panel will need to be wired into the mains and this should be carried out by a suitably qualified electrician. Always refer to installation instructions prior to installation for full details.
