

# Perfect fit clips

ViperClip is designed in the UK by a spark, so it's got your back on site. Just match your size of cable with any of our three clip sizes.

The ViperClip Fastening System will easily and safely align the clip over the centre of the cable. This means that the nails will secure the cable on either side, but will never bite it and put you in danger!

A UK PRODUCT

ViperClip is a small but mighty cable clip fastening system. When used together, the ViperClip gun and cable clips safely secure electrical cable with a precise, rapid strike, making every job faster, easier and safer.

Davy Gray, Spark and ViperClip inventor

# Designed for a spark by a spark

Standard & Fire Clips available in 3 sizes\*

\*see back cover for full clip and cable information

## One bite and you'll never go back

ViperClip is a completely unique, essential piece of kit for an electrician. It's so easy to use that ViperClip sparks can 'find their fast' safely with a no-stall install, every time.

## Green means it's safe to go!

The ViperClip system protects electricians and their reputations. Our fastening system always performs onsite, never overdriving or accidentally firing clips into the cable. Simply match the clip and guide to the cable, place flat against the surface and the nails will fire on either side of the cable. All our UK made clips provide double insulation.

<p><b>4X FASTER</b></p> <p>ViperClip is 4 x faster than using individual old style cable clips.</p>	<p><b>FITTED WITH CHAMBER WINDOW</b></p> <p>You can easily see the number and type of clips left in the chamber.</p>	<p><b>SMALL &amp; STRONG</b></p> <p>Our stapler is fast, small and light but still packs a mighty punch.</p>	<p><b>CABLE CENTERING ASSIST</b></p> <p>Match the right ViperClip to the cable and your clip will always be centred over the cable.</p>	<p><b>HARD STOP POINT</b></p> <p>Hard stop point makes sure the clip is not overdriven into the cable.</p>
<p><b>ADJUSTABLE CABLE GUIDE ON FRONT OF GUN</b></p> <p>Helps securely fasten cables when there is an obstruction on the joist.</p>	<p><b>GROUPING FACTOR FRIENDLY</b></p> <p>Easy cable spacing to help you calculate the Grouping Factor.</p>	<p><b>DOUBLE INSULATION</b></p> <p>All clips provide double insulation, so no need to earth the clips.</p>	<p><b>PERFECT FIT CLIPS</b></p> <p>Perfect fit clips make it impossible to fire clips into adjoining cables.</p>	<p>For use with Viperclip cable clips</p>
